DO YOU WANT INTERACTIVE ANALYSIS AND ACTIONABLE INSIGHT INTO THE MOST IMPORTANT ASSET – YOUR WORKFORCE?

SmartView is Beeline's collaborative and interactive visual analytics tool for contingent program management. It can help you uncover your human capital needs even before they arise and assist you in efficiently allocating resources to accommodate workloads and projects.

More than a series of static rows and columns, SmartView is a dynamic tool that allows you to interact with charts, graphs, outlier diagrams, maps and other in-depth feedback.

SmartView brings all of your contingent workforce data and metrics together in one powerful web-based interface. Whether you are looking for more insight into your spend, savings, candidates, requests, offers, contracts, rate cards, cycle times, demographics, and more. SmartView allows you to track, measure and analyze your data within seconds.

STOP IMAGINING. START DOING.

Imagine if your team no longer sifted through mounds of data, ran stacks of reports and assimilated endless spreadsheets. Imagine if questions could be answered by visualizing data real-time to determine root causes, make decisions, measure performance and improve program effectiveness.

With SmartView, you no longer have to imagine. Now, you can analyze and comprehend data through dynamic charts which can be customized to display the information in a way that is most relevant to you. You can quickly and easily view trends, outliers and patterns simplify your complex decisions.

PRODUCTIVITY IS BUILT IN.

SmartView contains a large set of pre-built metrics, allowing you to view and analyze your data without taking the time to write queries or build tables. With the simple click of the mouse, you have access to in-depth information including:

- **Program Analysis**
Comprehensive understanding of headcount, demographics and all program activity
- **Spend Analysis**
In-depth look into program spend enabling users to drill down and analyze the spend as well as identify new cost savings opportunities
- **Compliance Analysis**
Extensive insight into key information such as tenure, rate compliance and cycle times, enabling organizations to manage risk and any associated service level agreements
- **Supplier Analysis**
Complete rendering of supplier scorecards that ranks suppliers again each other
- **Rate Intelligence Metrics**
Thorough analysis of bill rates between suppliers, job titles, average bill rates, ranges, and how it compares to standard rate cards
- **Risk Mitigation**
Complete breakdown of tenure, how tenure affects rates, early terminations, why contractors are not working out and which suppliers they are coming from

Put the power of the world's best workforce analytics tool to work in your office today. For more information about how SmartView can help drive success in your business, visit beeline.com.
